RUKRA ALARM BUTTONS

The RUKRA alarm pushbuttons have got a speaker and a microphone. The microphone is always active during a call, the speaker is only active while pressing the white button.
The black alarm button must be pressed for 2 seconds to make an emergency alarm call.

End of alarm: The black alarm button has besides making an emergency alarm call even the additional function "end of alarm". Keeps the alarm button ± 8 seconds and the "end of alarm" call will be send to the RUKRA Web-based Call Center.

The alarm button set consists two buttons (on and below the elevator cabin) and comes including 3x Plug & Play connection cables, 2x double-sided mounting tape and 1x 3-way splitter.
