

Lommy Personal

GPS Trackers for professional and private use

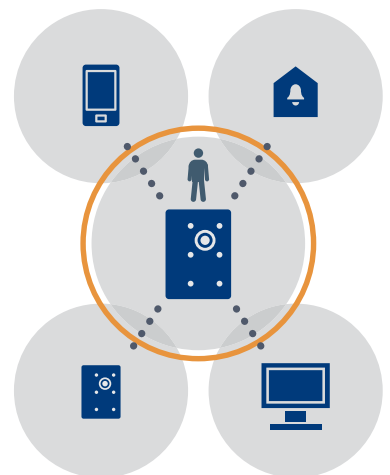

Small, user-friendly tracking device - for your personal protection 24/7

Lommy Personal (3rd generation) is a GPS tracking device, bringing you high levels of personal safety within a variety of demanding environments.

Offering flexible functionality and a user-friendly interface, Lommy Personal has become a market-leading solution. It is widely used within various business industries and public care services and also in private, domestic settings.

In combination with Lommy Tag, Lommy Personal operates effectively at wide-range, **both indoors and outdoors. It is the only product on the market with this ability.**

Connect your Lommy Personal to other devices, e.g. mobile phone, computer, alarm centre or additional Lommy devices. Help will always be within reach.

Lommy Personal will keep you safe at all times. It is widely used in both professional and private settings, e.g. protection of lone workers, social workers, elderly, children, etc.

Reliable GPS-tracking: Enhancing personal independence & protection

Smart, sophisticated and simple to use, Lommy Personal can be modified to match your specific needs. The ideal solution for enhancing personal independence and protection, including: Surveillance and protection of lone workers, social workers, elderly and those who suffer with dementia; Monitoring and protection of armored vehicles (e.g. money transports) and watchmen; Safety alarms for children and disabled people.

Fall Sensor

ACCIDENTS OR ASSAULTS.

A built-in acoustic fall sensor will detect any fall. Using sound height information, false alarms are reduced.

Lighthouse

COLOUR INDICATION. High-intensity light from an LED module at the top of the device will notify the user using different colours e.g. the light can indicate whether a person is inside, or outside an pre-defined area.

Programmable Buttons

CUSTOMIZABLE TO USER NEEDS. With 6 smart buttons, the unit is modifiable to meet specific needs. In just one click. Make a phone call directly to a predefined number. Send a predefined text message to preselected receivers; Register selected data on the server etc.

Alarm Button

IMMINENT DANGER. In a critical situation of imminent danger, simply push the red alarm button in the centre of the device to call for immediate assistance. Preselect one or multiple receivers of your call for assistance.

GSM

CALLING MADE EASY. Call a preselected person for help in just one click. A built-in microphone and loudspeaker allow you to speak directly with the person at the other end. It works just like a mobile phone, but is much easier to use.

Alarm Centre

ONE CLICK AWAY. Make a direct connection between your device and any chosen alarm centre. Immediate assistance will always be just one click away.

Vibrator

SILENT ALARM. Choose the built-in mechanical vibrator to be activated automatically when the alarm button is pushed. In situations where you wish for the alarm to be on silent, the vibrator works as an indicator, confirming that the alarm has been registered.

GPS

EXCELLENT PRECISION. A built-in GPS tracker, featuring high-level sensitivity, enables Lommy Personal to be localized within a few meters of precision, even in difficult environments.

Speaker

HIGH-QUALITY SOUND. Play pre-recorded voice messages on a built-in, MP3 player. If specific circumstances or situations are registered, voice messages can be sent to notify the user.
