

# Conventional Fire Products

## Panels

The FI/C range of conventional fire control panels features three models with 2, 4 and 8 zones. Housed in a stylish modern ABS housing, the FI/C range of fire panels is ideal for small to medium size installations.

## Detectors

The Firebrand series of conventional detectors have been designed, tested and CPD/EN54 approved, also CE and UL approval has been attained. Available in optical, heat, multi-heat and multi-sensor versions, the Firebrand conventional range of detectors is both reliable and aesthetically pleasing.

## FP3 Call Point

The FP3 is a unique manual call point, with high visibility LED, and which includes both frangible and resettable windows. It also offers user friendly selection of the monitoring resistors, 470 and 680ohms and normally open contact. A CPD approved liftup cover is also available. The FP3 is CPD and EN54-11 Approved.

## Repeaters

The Repeater panels, two models FI/C/REP and FI/C/MREP provide remote control and system display status for our range of conventional fire panels. It is available as both a Mini Repeater and in the standard FI/C enclosure.

## Sounders

The Firebrand range of electronic sounders are low consumption devices and are designed to be used as an unobtrusive low profile sounder, or as a base sounder to be installed in conjunction with a conventional detector. The range is composed of several versions in both base and wall mounted models, beacon, sounder and sounder / beacon.
